Story Title *

Ahc Reports Reports Ahc

Description

```
As a user, I want to ahc reports reports ahc so that the related functionality works as expected.
```

Acceptance Criteria *

```
Given reports exist in the system, when a user views or generates a report, then the report should display accurate and up-to-date information.
```

Generated Test Cases

20 test case(s) generated • Model: meta-llama/llama-4-scout-17b-16e-instruct • Tokens: 2944

Test Case ID	Title	Category	Priority	Expected Result
TC-001	View Existing Report	Positive	High	The report displays accurate and up-to-date information
TC-002	Generate New Report	Positive	High	The report is generated successfully and displays accurate information
TC-003	View Report with No Data	Edge	Medium	The report indicates that no data is available

Generated Test Cases

20 test case(s) generated • Model: meta-llama/llama-4-scout-17b-16e-instruct • Tokens: 2944

Test Case ID	Title	Category	Priority	Expected Result
▾ TC-001	View Existing Report	Positive	High	The report displays accurate and up-to-date information

CATEGORY	PRIORITY	TEST DATA
Positive	High	N/A

Test Steps for TC-001

STEP ID	STEP DESCRIPTION	TEST DATA	EXPECTED RESULT
S01	Navigate to the Reports module	N/A	Step completed successfully
S02	Select an existing report	N/A	Step completed successfully
S03	View the report details	N/A	The report displays accurate and up-to-date information

Story Title *

As a ward doctor, I want the dynamic queue list of AHC to automatically refresh every 30 seconds and support filtering by patient priority (emergency vs routine) so that I can attend to high-priority patients first.

Description

The existing queue currently loads patient lists only once when the dashboard is opened. The new enhancement adds real-time auto-refresh logic and introduces dynamic filters for patient priority and status ("Waiting", "Under Examination", "Discharged"). The update ensures that queue order and color coding change instantly when the patient status changes in the system.

Acceptance Criteria *

Given the doctor wants to view only critical patients, when the "Emergency" filter is applied, then only patients with critical priority should be visible.

Given the queue is auto-refreshed, then the UI should retain scroll position and active filters without manual reload.
